

KONICA MINOLTA

bizhub C35P

Smart and powerful in colour and B/W.

A4 Black & White **30** pages/min

A4 Full Colour **30** pages/min

Giving Shape to Ideas

bizhub C35P, office system

Fast and flexible on a small footprint

Small workgroups and teams in larger companies, for example human resources and controlling departments, require their own efficient printer for local colour and b/w printing needs. Providing speed and confidentiality close to the workplace, the bizhub C35P is such a workgroup printer that suitably complements larger output systems – whether as small networked device or as convenient desktop printer for instant output from one or more workstations.

- The bizhub C35P is surprisingly productive! This efficient A4 colour printer addresses any team's everyday printing needs with identical fast 30 ppm in colour or black and white as well as 100% productivity in duplex printing.
- With the duplex unit incorporated in its mainbody, the bizhub C35P boasts an impressively small footprint. Thanks to the Information Line design and generous range of above-its-class features, this compact and efficient printer integrates seamlessly into the bizhub product line-up.
- Equipped with high-definition Simitri® HD polymerised toner and thanks to 600 x 600 dpi resolution, it delivers a truly impressive image quality, no matter whether prints are in colour or black and white.

- With latest Emperon controller technology, standard Gigabit Ethernet and optional XPS, as well as convenient administration via PageScope software tools, the bizhub C35P is compatible with most Windows, Mac and Linux environments.

→ Configurations

bizhub C35P 

Attractive versatility, impressive results

→ Small but powerful

With its small footprint and compact size, the bizhub C35P is a high performance desktop printer that is always available but doesn't ask for a lot of space. Its identical fast colour and black & white print speed of 30 ppm in combination with the fast first print time of just 12.9 seconds as well as 100 percent duplex productivity make it an exceptional satellite printer installed close to where the work is. Delivering outstanding results in an instant, the bizhub C35P enhances the productivity of any team or workgroup.

→ High performance

Same as its multifunctional counterparts, the bizhub C35P uses latest Emperon™ controller technology and, integrating seamlessly into virtually any network, is compatible with standard operating systems and most business applications. Its 800 MHz page-processor plus standard 256 MB RAM enable it to perform like a professional, with Gigabit Ethernet another of its highlights. PostScript and PCL are available via the Emperon™ system and can be optionally extended to include XPS.

→ Enhanced functionality

Ensuring convenience, flexibility and ease of use, the bizhub C35P includes various PageScope tools and functionalities: PageScope Web Connection provides precise printer and consumables status information directly on the user's PC monitor. PageScope Data Administrator facilitates the allocation of user rights and output permissions, including for example restrictions to printing in colour. This tool also allows easy monitoring of individual user volumes.

The important aspect of security is covered with Konica Minolta's comprehensive security functionality. Secure printing for example is of particular importance when sensitive data, such as salary statements, need to be distributed.

→ Reliable remote monitoring

CS Remote Care is Konica Minolta's remote monitoring system for efficient communication between output devices and the Konica Minolta service organisation. Reducing the need for printer maintenance, this essential tool helps to avoid downtime of the printer, increasing the efficiency of the workgroup or team. CS Remote Care also automates the ordering of consumables and takes care of automatic service notifications.

→ Advanced media flexibility

The bizhub C35P's media handling capabilities are impressively versatile. Paper sizes A6 to A4 are processed via its standard paper feeder which, same as the duplex unit, supports paper weights between 60 and 210 g/m². An optional lower paper feeder increases the paper input capacity to generous 850 sheets. Departments like human resources benefit from straightforward printing of envelopes, references and certificates, while controlling will find it easy to produce diagrams and flow charts, presentations or analyses. The convenient N-in-1 feature helps to downsize printouts e.g. for filing, combining up to 16 pages of a document on a single sheet. Thanks to such media competence, the bizhub C35P is an excellent choice for small workgroups that need to print an extensive variety of documents.

PageScope Data Administrator

¹ Optional CF card enables direct printing (PDF, TIFF, JPEG), downloading fonts/profiles/overlays, collating, PageScope Account Manager, PDF direct print.

² Optional hard disc kit enables secure printing, proof-then-print, print & hold, job storing, XPS emulation and using downloaded profiles in addition to all extra functions with CF card.

■ All specifications relating to paper capacity refer to A4-size paper of 80 g/m² quality.

■ All specifications relating to printing speeds refer to A4-size paper that is printed crosswise in multipage, simplex mode.

■ The support and availability of the listed specifications and functionalities varies depending on operating systems, applications, network protocols as well as network and system configurations.

■ The stated life expectancy of each consumable is based on specific operating conditions such as page coverage for a particular page size (5 % coverage of A4).

The actual consumables life will vary depending on the use and other printing variables including page coverage, page size, media type, continuous or intermittent printing, ambient temperature and humidity.

■ Some of the product illustrations contain optional accessories.

■ Specifications and accessories are based on the information available at the time of printing, and are subject to change without notice.

■ Konica Minolta does not warrant that any prices or specifications mentioned will be error-free.

■ Microsoft, Windows and the Windows logo are trademarks, or registered trademarks, of Microsoft Corporation in the United States and/or other countries.

■ All other brand and product names may be registered trademarks or trademarks of their respective holders and are hereby acknowledged.

Product appearance, configuration and/or specifications are subject to change without notice.

Ecology & Environment

KONICA MINOLTA products are designed with the environment in mind.

- Energy Star
- RoHS Compliance
- WEEE Compliance
- Eco-friendly Toners
- Production at ISO Certified Factories

From consulting, system design, to operations, Konica Minolta offers total support to optimise your office output environment.
